Mercenary and Troop Availability

Mercenaries
- To hire a group of mercenaries, you must negotiate with a mercenary leader (same availability as retainers):
    - Sergeant: Level 2, leads a team (8-12 soldiers)
    - Officer: Level 4, leads a band (30-40 soldiers)
    - Captain: Level 6, leads a company (90-120 soldiers). Must be recruited through adventure.
- Supply Cost: 4 gp for each person and 12 gp for each horse every month while on the march (this includes wagons and baggage) or under siege.

Recruitment in Domains
- Troops may be recruited in a domain as if hiring mercenaries in a settlement of the same population as the whole domain, but treat the mercenary leader as if they are 1 level lower than they actually are.
- No hiring roll needs to be made for recruited troops.
- When recruiting troops, they may be trained to fill the role of the troop type rolled or any lower result on the troop type table.
- All equipment must be supplied for recruited troops.
- Levy:
    - The militia, when called, is 10% of the population size of the domain.
    - An additional 10% can be called as a peasant levy.
    - When a levy is called up, that portion of the population will produce no revenue that month.
